

Otto Bock®

QUALITY FOR LIFE

B400

Compact Freedom

Whether you're inside or outside, the B400 always has you going the right way. Its compact and stable design makes it a small all-rounder for every kind of daily activity, from indoor work to shopping and dining out. Its special frame distinguishes it from the design of other power wheelchairs. Compact outer measurements of only 58 cm let it easily go through even the narrowest of halls. A low seat height of 43 cm allows its user to drive under tables and desks without any difficulty.
